

How to connect to this printer:

The only way is to

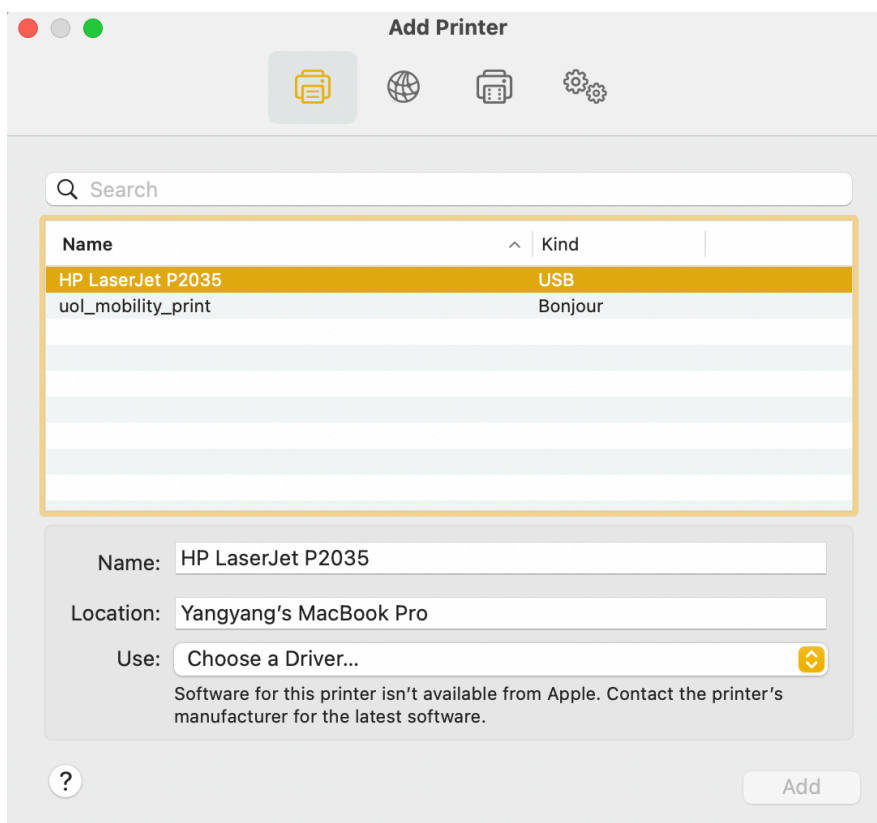

Turn on the printer, then connect the USB cable to your laptop

If your laptop is running on **MacOS**:

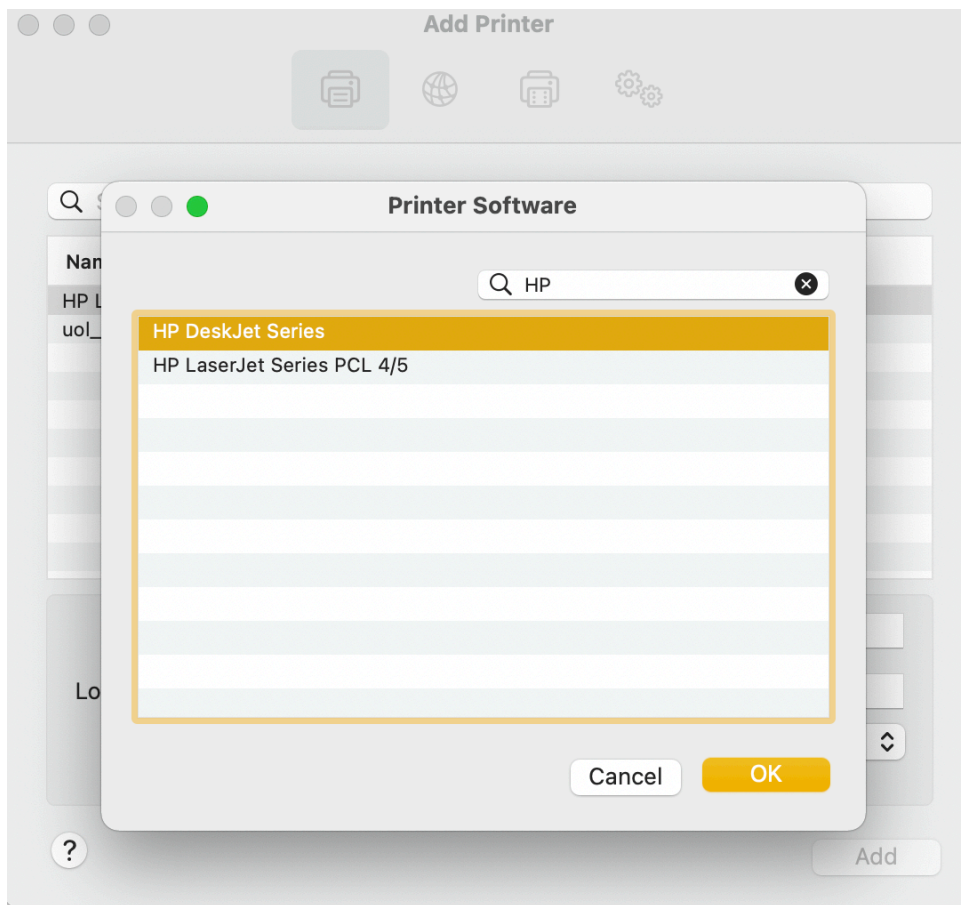

- 1) After connecting the USB cable to your laptop, open the file you want to print
- 2) Click <Print>
- 3) At the printer section, click <Add Printer...>

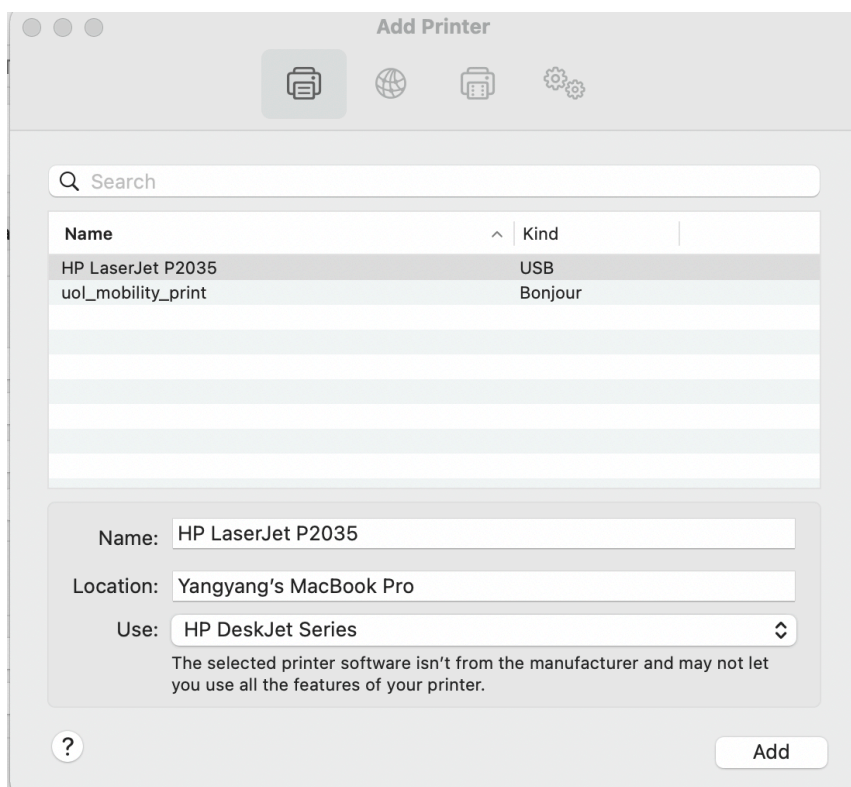

4) This will direct you to this page below. Select **HP LaserJet P2035**.

5) At <Use:>, click <Choose a Driver>, then <Select Software>, filter “HP”, select <HP DeskJet Series>, then <OK>.

6) On this page, click <Add> if you see the driver has been successfully added to the <Use:> section.

7) After setting up, if you see HP LaserJet P2035 on the list of available printers to use, click that and you can start printing.

The screenshot displays a printer selection interface. On the left, a document preview shows instructions for connecting the printer via USB. The main area on the right features a 'Printer:' dropdown menu set to 'HP LaserJet P2035', a 'Copies:' input field with the value '1', and 'Pages:' options with 'All' selected. Below these are 'From:' and 'to:' input fields, both containing the number '1'. At the bottom, there are buttons for 'PDF', 'Cancel', and 'Print'.

Printer: HP LaserJet P2035

Copies: 1

Pages: All From: 1 to: 1
